

PHYSICAL WATER CONDITIONERS

Wrappa

Electronic Water Conditioner

What is the Wrappa?

The Wrappa is an electronic scale inhibiting device that uses radio frequencies to alter the characteristics of hard water.

Why Choose the Wrappa?

- No need to cut the pipe or disturb any existing plumbing when installing
- Can be installed on a variety of different pipe sizes
- Works on any pipe work material including lead and plastic
- Removes existing scale
- Can help reduce heating bills
- No maintenance required

Most Frequently Asked Question

Q How long does it take for the Wrappa to remove existing scale?

A The Wrappa starts work inhibiting the build-up of future limescale immediately after it is installed. Removal of existing scale build-up is a slow process and will depend on the level of deposits.

IMPORTANT NOTE

The Wrappa is powered by mains electricity and will need to be checked periodically to ensure that the light that indicates the unit is functioning properly remains illuminated.
